Critical Thinking Assignment (75 Points)

Compare and Contrast Process Management Utilities of Linux OS with Windows OS

Process management utilities in the Linux OS involve using shell commands to perform various tasks related to controlling, monitoring, and interacting with running processes. In contrast, Windows OS offers the Task Manager, a graphical tool that provides an overview of running processes, system performance, and resource usage.

Perform at least five tasks on each OS using these two process management utilities. In your Critical Thinking Assignment, prepare a summary to describe the results, including screenshots, in your paper. Compare their ease of use and ability to intervene in a process.

Grading Criteria

- Your paper should be 2-3 pages in length, not including the cover page and references page.
- Your paper must be formatted according to APA guidelines in the CSU Global Writing Center (available in the left-hand navigation panel).
- Your claims should be supported by evidence. Include 2-3 credible references. The CSU Global Library (available in the left-hand navigation panel) is a good place to find these references.
- All references must be cited in the text and listed on the references page, according to APA formatting.
- See the rubric below for more details about how you will be graded for this assignment.

Completion of Required Tasks	**15 pts** **Meets Expectation** Performs and clearly documents at least five process management tasks on each OS. Tasks are accurately executed and appropriately explained with relevant screenshots.	**12 pts** **Approaches Expectation** Performs most required tasks but may omit one or two tasks or show minor inaccuracies in execution or documentation.	**9 pts** **Below Expectation** Performs fewer than five tasks per OS or explanations/screenshots are incomplete or unclear.	**6 pts** **Limited Evidence** Minimal or no attempt to perform the required tasks; little to no evidence of understanding.	15 pts
Comparison & Analysis of Utilities	**20 pts** **Meets Expectation** Provides a thorough comparison of Linux and Windows process management tools, discussing ease of use, functionality, and intervention ability with insightful analysis.	**16 pts** **Approaches Expectation** Provides a basic comparison with some discussion of ease of use and functionality but lacks depth or misses one comparison area.	**12 pts** **Below Expectation** Provides superficial or unclear comparisons; analysis lacks coherence or detail.	**8 pts** **Limited Evidence** Comparison missing or shows no critical engagement with the topic.	20 pts
Organization & Clarity of Writing	**10 pts** **Meets Expectation** Paper is well-organized, clearly written, and flows logically. Each section (introduction, analysis, conclusion) supports the	**8 pts** **Approaches Expectation** Organization is generally clear, though some sections may lack smooth transitions or clear focus.	**6 pts** **Below Expectation** Writing lacks clarity or logical flow; sections are disjointed or repetitive.	**4 pts** **Limited Evidence** Paper is disorganized, confusing, or incomplete.	10 pts
